

## Installation

**I have been using ClipMate for, I believe, more than 20 years. Recently, I bought a new laptop that came (maybe sadly) with Windows 11. I cannot get my ClipBar to install properly. I want it to work like it always did in Windows 10.**

**Please help me make that work again. Many thanks.**

Windows 11 does not support toolbars in windows explorer, so the ClipBar cannot work. If Microsoft brings this feature back, it should work automatically.
